AIR CONDITIONING**

# COPPER TUBES FOR REFRIGERATION AND AIR CONDITIONING

## FRIGOTEC® - Copper tubes in coils and straight lengths

FRIGOTEC® - the seamless drawn bma-refrigeration tube is used mainly for gases in refrigeration equipment, refrigeration and air conditioning units as well as in heat exchangers. An outstanding property of this tube is its clean and dry inner surface and the closed ends, right after production.

FRIGOTEC® - tubes do not exceed the restricted maximum total residual carbon on the inner tube surface according to EN 12735-1 and they are also suitable for refrigerants R407C and R410A.

FRIGOTEC® - tubes meet the requirements for refrigeration/air conditioning tubes according to EN 12735-1 (which replaces DIN 8905) and according to ASTM B 280.

FRIGOTEC® - the ends are closed right after production to avoid contamination during storage and transport.

	Straight lengths	Coils
<b>Material:</b>	Cu DHP	Cu DHP
<b>Temper:</b>	R290	R220
<b>Ends:</b>	closed	closed
<b>Packing:</b>	bundled	in cardboard boxes
<b>Tolerances:</b>	EN 12735-1	EN 12735-1
<b>Delivery conditions:</b>	EN 12735-1 (which replaces DIN 8905) and acc. to ASTM B280	EN 12735-1 (which replaces DIN 8905) and acc. to ASTM B280
<b>Marking (Sample):</b>	metric	

FRIGOTEC® BMA 12 x 1 6,35 mm x 0,76 mm x 15,25 m EN 12735-1 year/quarter

The following tubes are available from stock:

Metric OD	Metric WT	kg/m	Length in meters
8	1	0,195	5
10	1	0,251	5
12	1	0,307	5
15	1	0,391	5
16	1	0,419	5
18	1	0,475	5
22	1	0,587	5
28	1	0,754	5
28	1,5	1,111	5
35	1	0,952	5
35	1,5	1,404	5
42	1	1,148	5
42	1,5	1,698	5
54	1,5	2,205	5
54	2	2,907	5
64	2	3,466	5
76,1	2	4,143	5

Metric OD	Metric WT	kg/m	Coil length in m
8	1	0,195	50
10	1	0,251	50
12	1	0,307	50
15	1	0,391	50
16	1	0,419	50
18	1	0,475	25
22	1	0,587	25
